

Sea Technology Index

Volume 27, 1986

This instant reference index of technical subjects and news appearing in Volume 27, (1986) of *Sea Technology* magazine appears in two parts: Part one—subject index; and part two—authors. Numbers following subjects and authors indicate month and page number.

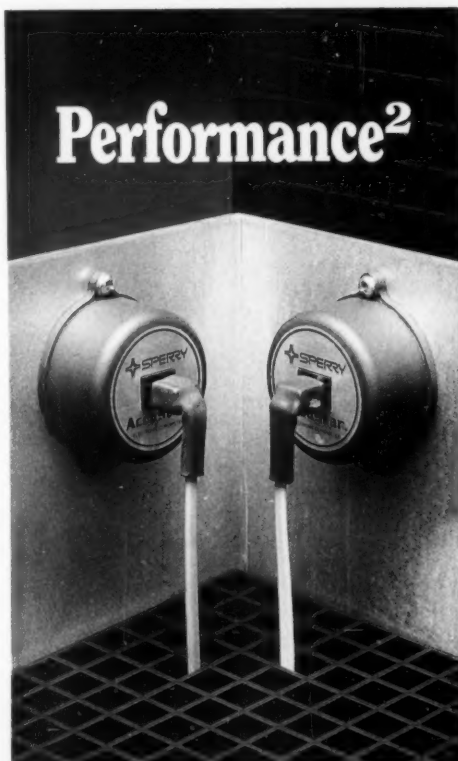

Part One SUBJECT INDEX

A	
A-Frame, design for <i>R/V Seward Johnson</i> (article) . . .	6/24
Aanderaa Instruments (profile) . . .	10/33
Acoustic navigation . . .	12/49
Acoustic tracking under ice (article) . . .	7/21
<i>Alvin</i>	
hydrothermal vent survey (Atlantic) . . .	8/79
<i>Titanic</i> expedition (article) . . .	9/19
Antifoulant paints, marine, TBT use in . . .	3/60
Antisubmarine warfare,	
budget forecast (article) . . .	1/47
C/I concentration (editorial) . . .	11/7
fiber optics (article) . . .	11/19
funding history (table) . . .	11/11
Navy monopoly stripped . . .	10/48
new requirements (article) . . .	11/10
T-AGOS funding increasing (editorial) . . .	4/7
techniques from seismic surveys (article) . . .	11/39
Aquaculture	
new instrumentation development (article) . . .	2/30
new shrimp vaccine developed . . .	12/54
Arctic haze . . .	4/58
Arctic Winter West '86,	
ship performance study (article) . . .	12/33
Arctic	
DoE development plans (article) . . .	4/17
new oil rig designs (article) . . .	4/10
ship performance study (article) . . .	12/33
B	
Ballard, Dr. Robert D. (profile) . . .	3/41
Bathymetric surveys, EEZ, private venture . . .	8/9
Beach erosion, wood construction (article) . . .	2/36
Beatrice buoy (article) . . .	10/37
Biotechnology, new California laboratory planned . . .	8/81
<i>Blue Revolution</i>	
Congress awards grant . . .	7/9
production funding completed . . .	12/9
television project (article) . . .	8/55
Botsler, RADM. John D., retires . . .	9/9
Budget Reconciliation Bill . . .	5/44
Budgets, ocean	
civil ocean funding outlook good (editorial) . . .	6/7
Congressional support (editorial) . . .	2/7
future opportunities? (editorial) . . .	10/7
FY 87 budget allocations (article) . . .	3/37
FY 87 for NOAA set . . .	11/9
FY 87 funding authorization (MarAd, USCG) . . .	5/44
Gramm-Rudman-Hollings cuts (editorial) . . .	1/7
100th Congress support hopes . . .	12/42
Buoys	
Beatrice, giant data buoy (article) . . .	10/37
deep sea moorings (article) . . .	7/36
low-cost drifter tested . . .	2/55
Buoys, drifting (TOGA) (article) . . .	9/34
C	
Cable laying, measuring bottom roughness (article) . . .	4/23
Cables, new handling equipment (article) . . .	10/10
Cables, underwater	
computer-aided design (article) . . .	7/10

MTS Cable & Connector Workshop (report) . . .	4/38
power cables (article) . . .	4/23
power for Liberty Statue (article) . . .	7/19
Calio, Anthony J. (profile) . . .	9/39
<i>Challenger</i> disaster	
Bartholomew (SupSalv) press conference . . .	7/60
submersibles key to debris search (article) . . .	5/37
submersibles & ROVs join debris search . . .	3/9
Commercial diving, integrate w/ROVs (article) . . .	12/30
Commercial fishing	
industry progress slow (article) . . .	1/48
outlook still uncertain (article) . . .	7/28
Communications	
air-to-submarine, contract awarded . . .	2/54
cellular net in Gulf of Mexico (article) . . .	5/10
Inmarsat leases new capacity on Marisats . . .	12/50
Inmarsat satcom accepted . . .	6/54
medical advice by satellite (article) . . .	5/13
meteor burst . . .	9/56
Navtex applications (article) . . .	5/16

new terminal offers dual telephone operation . . .	12/51
satellite (Inmarsat coverage gap) (editorial) . . .	5/7
Composites, fiber-reinforced materials (article) . . .	7/31
Computer software, ocean contour plotting . . .	3/66
Conferences	
13th Cable & Connector Workshop (report) . . .	4/38
IEEE Working Conference on Current	
Measurement (report) . . .	4/41

Sperry's AccuStar Electronic Clinometer is the low-cost answer for your dual-axis angle measurement requirements. The Clinometers provide exceptional dual-axis performance because they exhibit minimum cross-axis sensitivity. In addition, the AccuStar clinometers feature:

□ Small size and choice of digital or analog I/O for easy mechanical and electrical integration.

□ Economy, priced less than \$100 per axis.

Worldwide Choice of Professionals for Deep Water Surveys

Raytheon Deep Water Bathing Systems are standard operating equipment aboard the oceanographic vessels of many nations and one of the world's largest survey ships, M.V. "AMERICA". Basic system, consisting of recorder, transceiver and transducer, provides full ocean capability with minimum investment. Building block design allows expansion of system to include a Precision Depth Digitizer, Correlation Echo Sounder Processor and Switch Panel interface for components. For details, contact Raytheon Ocean Systems Company, Westminster Park, East Providence, RI 02914 USA Telephone (401) 438-1780 TELEX 6814078.

CIRCLE NO. 22 ON INQUIRY CARD
DECEMBER 1986 / SEA TECHNOLOGY / 39

PROBLEM: Control Cable Bend and Tension to Successfully Lay Fiber Optic Cable in the Ocean

When AT&T needed to lay the first undersea fiber optic cable, General Oceanics found a way...

- * to satisfy the requirement for a 3-meter (9.3-foot) overboarding block diameter
- * yet at a 10-fold savings in block weight
- * and without exceeding 3° angular bend over each sheave
- * While keeping full winch control of cable tension
- * even under state 4 and 5 seas.

General Oceanics' fully instrumented (tension, payout, rate) counterbalanced multi-sheave curved-beam block (model M4000 series)* and winch control system (model 4048WCT) provided the solution.

Model M4000 counterbalanced multi-sheave blocks are available in 1- to 5-meter (3.28 to 16.8-foot) diameters and 2272 to 45,454 kg (5K to 100K lbs.) S.W.L. *Patented

General Oceanics' model 4048WCT winch control system for controlling tension.
